ABOUT

iOS Developer with **8+ years** of commercial experience. Worked in teams of **2–20 people** (on-site and remote). Delivered **3 apps** from scratch to the App Store, including CI/CD setup, analytics integration, and testing implementation. Expertise in UI architecture: designed scalable Backend-Driven UI systems and declarative frameworks. Built a design system from the ground up.

Improved app stability by increasing crash-free rates through automated testing and QA processes. Stay current with iOS/Swift updates, applying new features in production. Additional focus on machine learning and blockchain. Contribute to the community via a technical [blog](#) and conference speaking engagements.
